AUtoMLy — Alabama Medicaid Policy Copilot

What we finished this week, November 5–12, 2026.

MILESTONE 3 REPORT

Final

Seven pages, matched to the live eight-step workflow.

WALKTHROUGH VIDEO

7:19

Published on AUM YuJa and GitHub, with captions.

PROGRESS LOG 3

Complete

One page, with reported hours, for Weeks 9-12.

GOVERNANCE PLAN

Drafted

10 pages; meets every rubric section. Due Nov 22.

Milestone 3 is wrapped up, and the Implementation & Governance Plan is ready for review.

Where everything lives (pull all three at home)

Solution repo · private

Course repo · private

This deck and its builder

Deliverables repo · public

J.O.-only copies of the deck and reports

The Week in Five Steps

From a finished workflow to a finished Milestone 3 package and a deployment plan.

Nov 9

Planned the walkthrough video

Storyboard and plain-language narration script for a tour of every workflow path.

Nov 10

Recorded and released the video

Live dark-mode capture of each path; version 4 (7 min 19 s) released with captions.

Nov 10

Aligned the Milestone 3 report

Updated to the eight-step, confidence-routed design; expanded the student-contribution disclosure.

Nov 12

Finished the Milestone 3 package

Branded page-one screenshot, official AUM YuJa video link, and Progress Log 3 with reported hours.

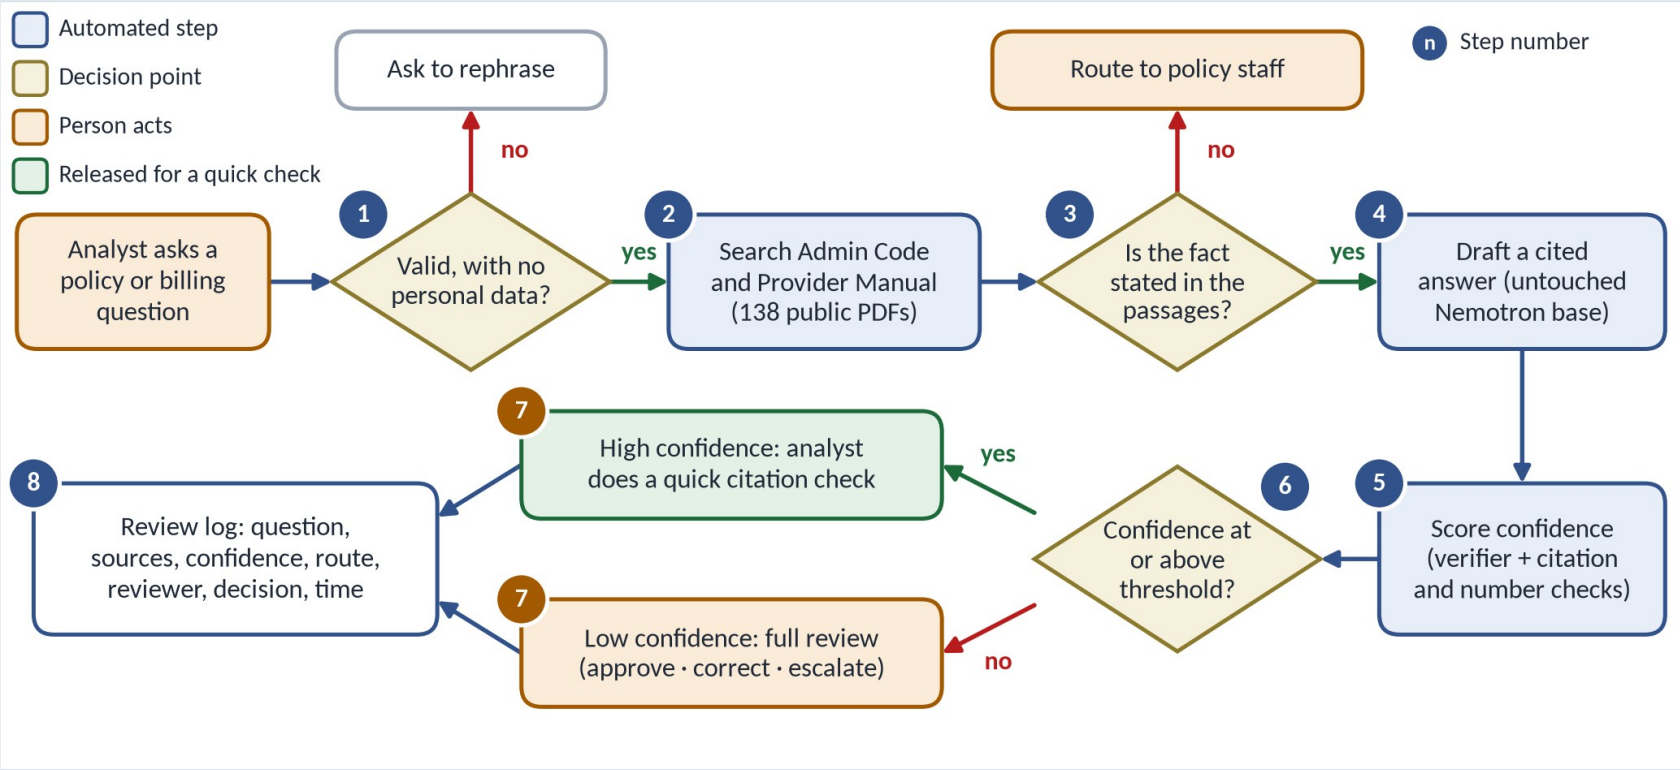

Nov 12

Built the Implementation & Governance Plan

Platform, cost and return, people, rollout and governance, mapped to the rubric.

How AUtoMLy Works: Eight Numbered Steps

The numbers match the working system, the Milestone 3 report and the new plan.

Steps 1–6 and 8 are automatic

They take a few seconds per question.

Step 7 is a person

An analyst checks every draft against the cited page.

Clear exits

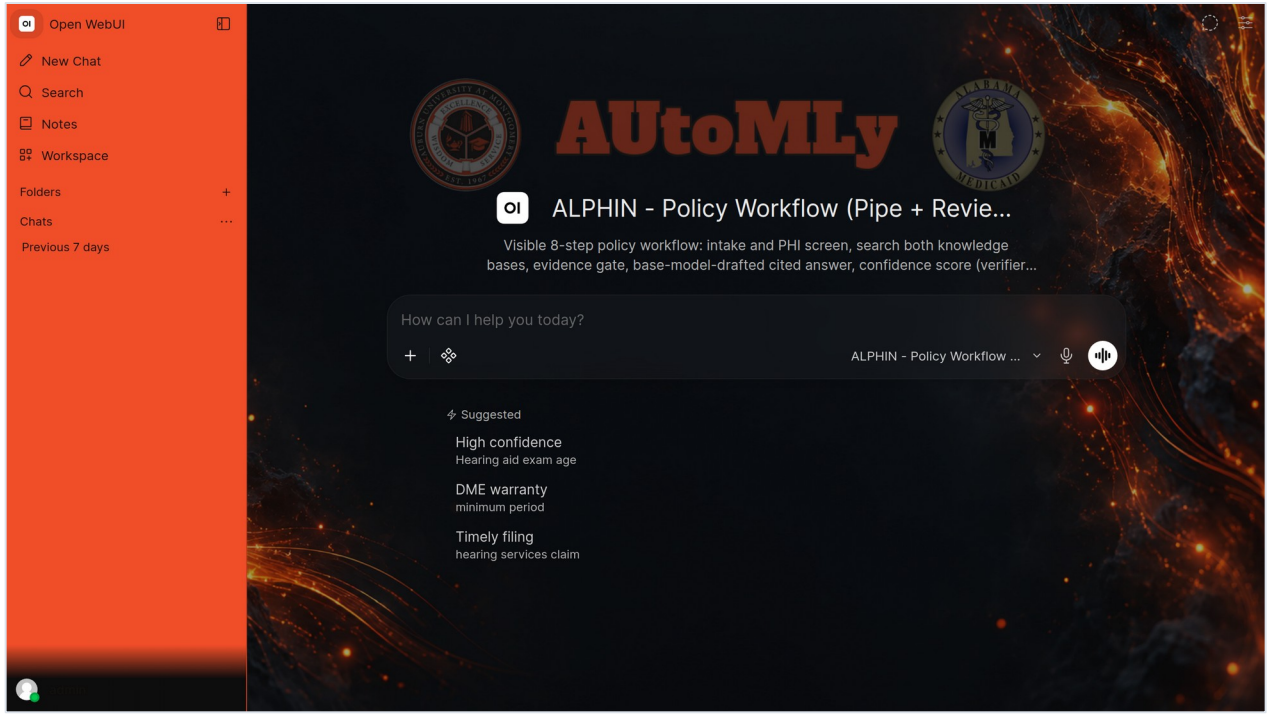

Unclear questions are rephrased; questions the manuals do not answer go to policy staff.

Advisory only

It never decides anyone's eligibility or payment.

Milestone 3 Report: Final and Aligned

The report now describes exactly what the live system does.

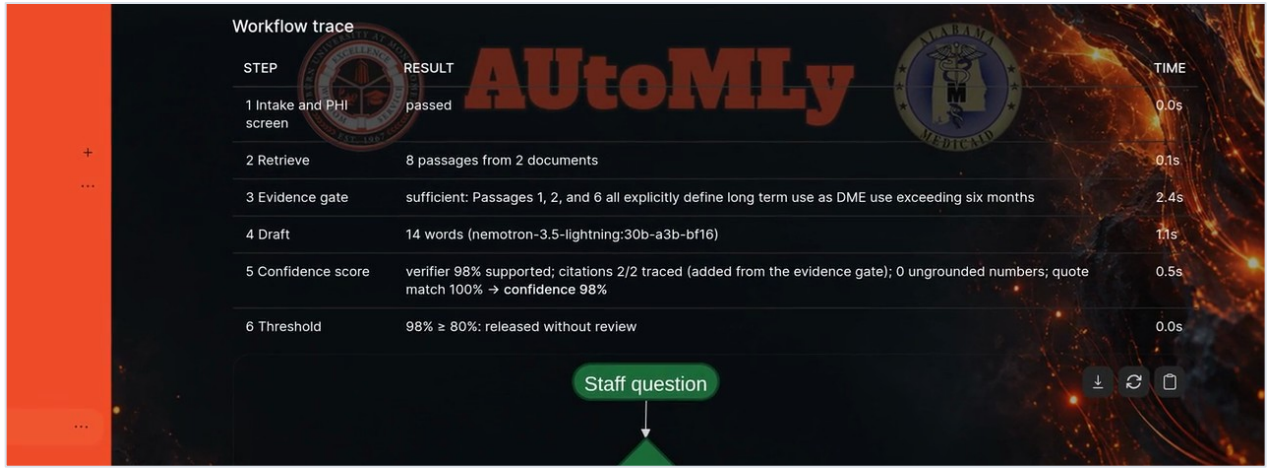

Page-one figure: the branded Open WebUI home screen with the ALPHIN workflow selected.

- ✓ **Matches the eight-step workflow**
  Confidence routing replaces the older auto-clear rule.
- ✓ **Real branded screenshot on page one**
  Dark mode, AUM-orange sidebar, current suggested prompts.
- ✓ **Official video link added**
  AUM YuJa first; GitHub MP4 with captions as the backup.
- ✓ **Clear authorship**
  Expanded disclosure of the student's own contributions.
- ✓ **Seven pages, clean layout**
  Sections 1, 2 and 3 start on pages 1, 2 and 3.

Ready to submit with the video link and Progress Log 3. Milestone 3 is due Sunday, November 15.

Walkthrough Video: Published

A plain-language, captioned tour of every path through the workflow.

Frame at 2:10: the workflow trace for a high-confidence answer (98%), released.

LENGTH

7:19

1280 × 720, 30 fps

CAPTIONS

Built in

Plus SRT and VTT files

WHERE

AUM YuJa

Backup: GitHub release

- ✓ **High-confidence answer released (98%)**
- ✓ **Low-confidence answer (8%) held, then corrected**
- ✓ **Question not in the manuals sent to policy staff**
- ✓ **Personal-data and too-short questions stopped**
- ✓ **Service failure handled, then recovered**
- ✓ **Review history shown with /log**

Two GitHub copies: a full-attribution private release and a J.O.-only public release.

Implementation & Governance Plan: Drafted

Ten pages that answer how AUtoMLy would run, and how it would run responsibly.

Rubric criterion	Points	Where the plan covers it
Platform evaluation	**15**	Section 2: build, buy or partner, with scores and a hardware path
Cost, TCO and ROI	**15**	Section 3: three-year costs from the Milestone 2 result, with a low-end case
Cross-functional plan and rollout	**20**	Sections 4–5: roles, RACI, engagement record, change plan, four phases
Governance grounding and uses	**20**	Sections 6 and 9: EU AI Act tier, NIST mapping, allowed and banned uses
Operational governance	**20**	Sections 7–8: owners, shutdown times, incident steps, monitoring
Model card and recommendation	**10**	Appendix A and Section 11: deploy with eight checkable conditions

Every template section is covered, plus the required AI Use Disclosure.

Platform Choice: Build It, Starting Small

Scored on accuracy, data control, flexibility, skills, growth and cost (out of 18).

BUILD (RECOMMENDED)

15 / 18

Measured accuracy on these manuals; data stays in the agency

BUY

11 / 18

Microsoft 365 Copilot agent; lowest cost to start

PARTNER

10 / 18

A contractor builds and hosts it

The hardware path: the large purchase waits until the pilot proves its value

GB10 box · $6,950

Test and pilot (Phases 0–2).
Kept afterwards as the backup.

→

Gate 2

Eight clean weekly audits and at least 45 staff committed.

→

DGX Station GB300 · $92,887

Supermicro, budgeted. HP ZGX Fury G1n ($132,000) is the premium option.

Optional faster test box: a workstation with one RTX PRO 6000 Blackwell GPU (about $22,000). The Station can be split into seven workspaces for other agency AI projects.

Cost and Return Over Three Years

Savings come from the Milestone 2 final-test result (138 of 150 drafts usable).

NET GAIN (3 YEARS)

+$84k

Low end of the result: +$50k

PAYS FOR ITSELF

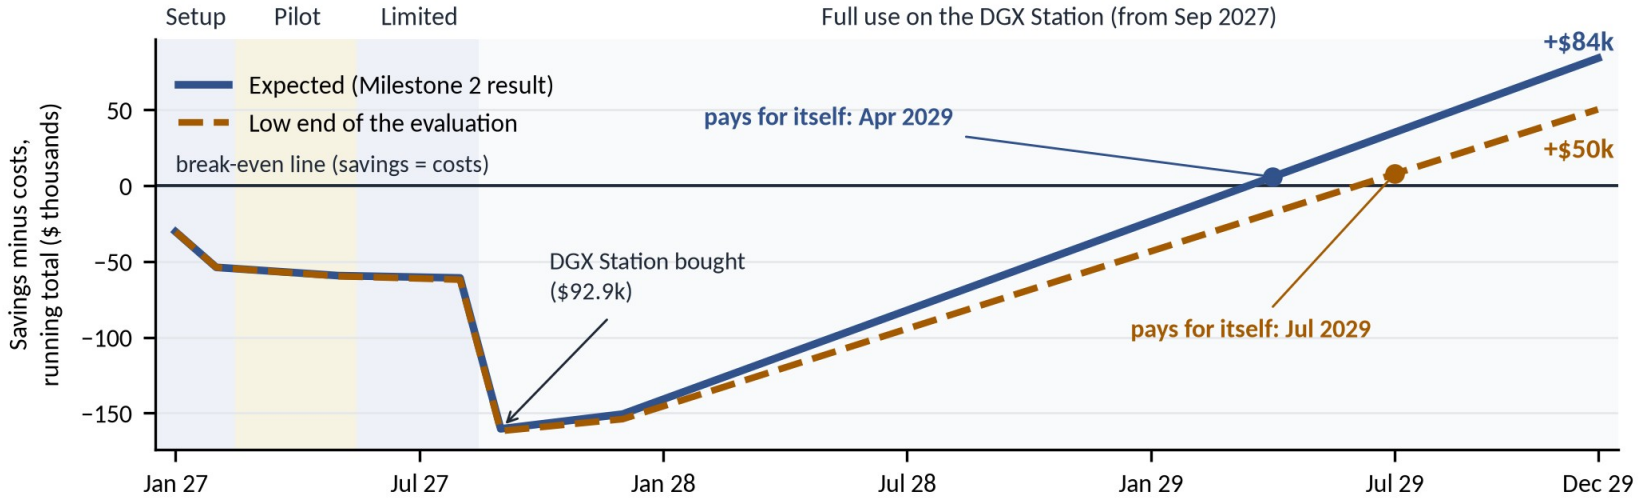

Apr 2029

Low end: Jul 2029

STAFF TO BREAK EVEN

About 37–41

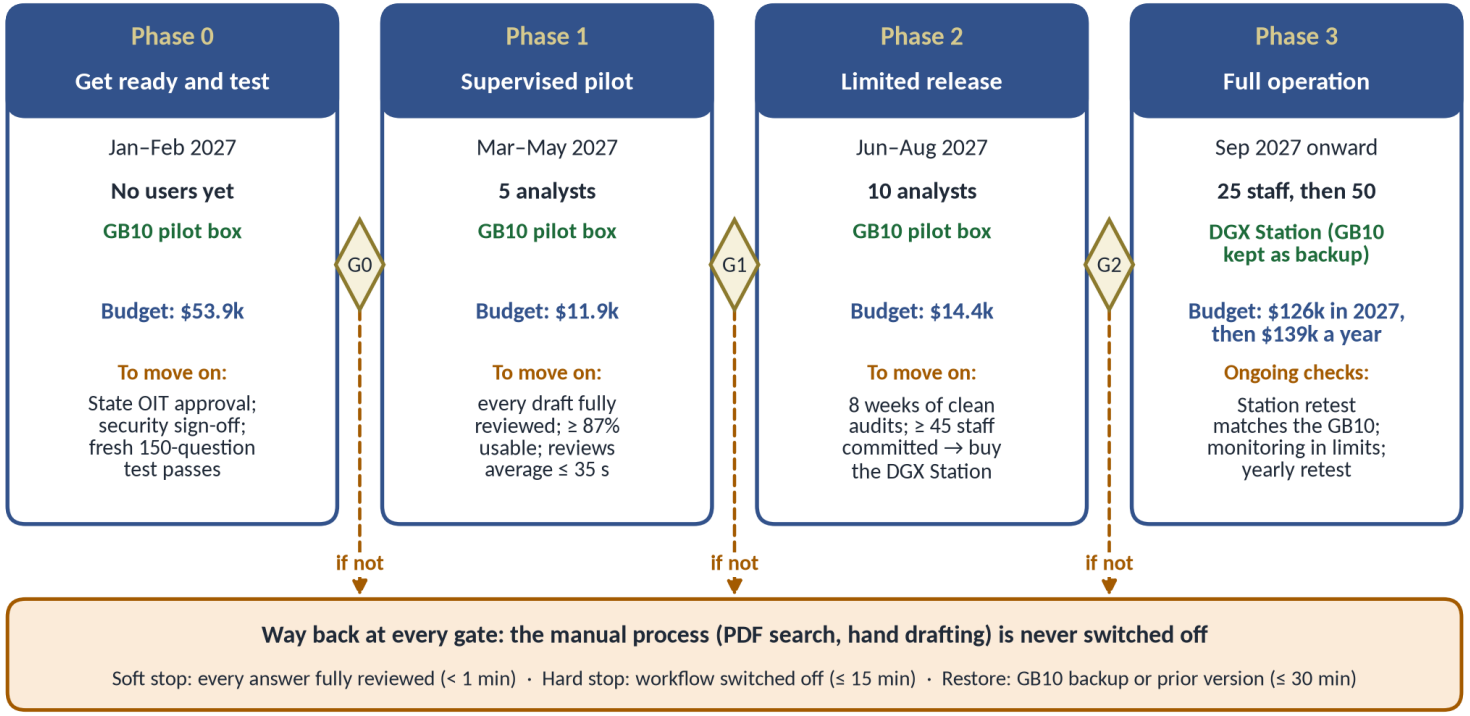

The plan grows to 50 users

Every 100 questions take about 140 analyst minutes by hand and about 61 with AUtoMLy, including checking every draft.

Rollout and Governance

Four phases, a written gate between each, and a way back at every step.

✓ EU AI Act: limited risk

Answers policy questions; never judges a person.

✓ NIST AI RMF

All four functions tied to project documents.

✓ Named owners

Soft stop < 1 min; hard stop ≤ 15 min.

✓ Watched every week

Audits, drift triggers and subgroup checks.

✓ Deploy with conditions

Eight conditions, each with a way to verify it.

Recommendation: deploy with conditions. It starts with a fresh 150-question test, and every draft stays under full review until it passes.

Status and Next Steps

Where each deliverable stands tonight.

Deliverable	Status	Due
Milestone 3 report and video	**Final; ready to submit**	Sun, Nov 15
Progress Log 3	**Final; ready to submit**	With Milestone 3
Implementation & Governance Plan	**Draft complete; student review**	Sun, Nov 22
Final Report	**Reuses the plan's budget, schedule and diagram**	Tue, Dec 1
Final Defense	**Planned on Microsoft Teams**	Tue, Dec 8

Next: confirm the plan's 50-user assumption and the Station vendor (Supermicro or HP), then submit.
