100

100 Children’s Specialty Clinics

Children's Specialty Clinic Services are specialty-oriented services provided by an interdisciplinary team to children who are eligible for EPSDT services and who experience developmental problems. Children's Specialty Clinic Services include preventive, diagnostic, therapeutic, rehabilitative, or palliative services provided in a clinic setting that is not part of a hospital but is operated to provide medical care on an outpatient basis to children with special health care needs.

Clinic services include the following outpatient services:

- Services furnished at the clinic by or under the direction of a physician or dentist
- Services furnished outside the clinic, by clinic personnel under the direction of a physician, to an eligible individual who does not reside in a permanent dwelling or does not have a fixed home or mailing address

  Clinics include:

Augmentative and Alternative Communication
Behavior Assessment (Sparks only)
Biochemical Genetics (Sparks only)
Cerebral Palsy
Child Development (Sparks only)
Cleft Palate
Cystic Fibrosis
Dentistry (Sparks only)
Eye
Feeding (OT)
Genetics
Hearing
Hearing Aid
Hearing Assessment
Hemophilia
Limb Deficiency
Multiple Disabilities
Neurology
Neuromotor
Neurosurgery
Orthopedic
Pediatric Communication
Pediatric Evaluation
Pediatric Orthopedic
Pediatric Surgery
Psycho-education
Scoliosis
Seating, Positioning & Mobility
Seizure
Speech Pathology
Spina Bifida
Teen Transition
Urology

Added: and Alternative

Eligible persons may receive Children's Specialty Clinic Services through providers who contract with Medicaid to provide services to children eligible for EPSDT services.

The policy provisions for clinic providers can be found in the *Alabama Medicaid Agency Administrative Code,* Chapter 61.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2026 American Medical Association and © 2026 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

100.1 Enrollment

The Alabama Medicaid Agency fiscal agent enrolls children's specialty clinics and issues provider contracts to applicants who meet the licensure and/or certification requirements of the state of Alabama, the Code of Federal Regulations, the *Alabama Medicaid Administrative Code,* and the *Alabama Medicaid Provider Manual.*

In order to meet federal enrollment criteria, all Children's Rehabilitation Services providers must have a NPI with ADRS/CRS identified as payee. Sparks Rehab Center shall submit claims for clinic services to Medicaid under the physician's clinic NPI or (if no physician is present) under the clinic NPI.

Refer to Chapter 2, Becoming a Medicaid Provider, for general enrollment instructions and information. Failure to provide accurate and truthful information or intentional misrepresentation might result in action ranging from denial of application to permanent exclusion.

National Provider Identifier, Type, and Specialty

A provider who contracts with Alabama Medicaid as a clinic is added to the Medicaid system with the National Provider Identifiers provided at the time application is made. Appropriate provider specialty codes are assigned to enable the provider to submit requests and receive reimbursements for clinic-related claims. The 10-digit NPI is required when filing a claim.

Clinics are assigned a provider type of 57(Clinics). Valid specialties for clinics include the following:

- Children's Rehabilitation Service (015)
- EPSDT (560)
- Hemophilia (990)
- Orthodontia (273)
- Radiology Clinics (995)
- Sparks Rehab Center (850)
- Optometry (180)
- United Cerebral Palsy (UCP) (840)

Physicians and certified registered nurse practitioners affiliated with children's specialty clinics are enrolled with their own NPI, which links them to the clinic. The provider type for the physician and certified registered nurse practitioner is 57 (Clinics). The valid specialties are any of those specialties valid for physicians and certified registered nurse practitioner. Please refer to Chapter 28, Physician, for a listing of valid specialties.

All other personnel affiliated with the children's specialty clinic bill using the clinic's NPI and are not assigned individual NPIs.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2026 American Medical Association and © 2026 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Enrollment Policy for Children's Specialty Clinics

Providers are clinics organized apart from any hospital that operate to provide specialty care through an interdisciplinary team approach.

Clinics must meet recognized standards of care for children with special health care needs and provide services in their clinics for the following disciplines, at a minimum:

- Specialty physicians
- Certified Registered Nurse Practitioners
- Nurses
- Social workers/service/care coordinators
- Physical therapists/Occupational therapists
- Audiologists
- Registered Dietitians
- Speech-Language Pathologists

All providers serving children must meet state and federal criteria for participation in the Medicaid program.

100.2 Benefits and Limitations

All Children's Specialty Clinic Services must be furnished by or under the direction of a physician directly affiliated with the clinic. "Under the direction of" means the physician must see the patient at least once, prescribe the type of care, and periodically (at least annually, unless the scope of services requires more frequent review) review the need for continued care.

Providers must develop a patient care plan that provides medical and rehabilitative services as well as coordination and support services to children with special health care needs.

Case management/service/care coordination is an integral part of ADRS/CRS clinic activities. Case managers/service/care coordinators provide services such as assessment, care plan development, linking/coordination of services, and parent counseling, parent and child education, and follow-up. Types of services provided include assisting the family with surgery/hospital arrangements, scheduling and coordinating appointments for evaluation and treatment, referral to appropriate resources as needed, home visits, school visits, patient and parent counseling/anticipatory guidance, and patient support. Individual case managers must meet the following criteria at a minimum: a four-year college degree or a registered nurse, and all case managers/service/care coordinators must meet state licensure requirements at the appropriate educational level and receive training appropriate to the need of the target population.

Children's Specialty Clinic Teams

The clinic teams are usually comprised of physicians, certified registered nurse practitioners, registered nurses, social workers, therapists, audiologists, and rehabilitation assistants, clerical and/or support personnel. Clinic composition may vary depending on the type of clinic; however, clinic team protocol must be furnished to and approved by Medicaid. Clinic team protocol will be updated on an as-needed basis, but annually at a minimum. The team

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2026 American Medical Association and © 2026 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

will establish a written patient care plan. The case management team then implements this plan.

100.2.1 Covered Services

Children's Specialty Clinic Services do not include services rendered under other Medicaid programs.

Children's Specialty Clinic Services are covered when provided by a Medicaid-enrolled children's specialty clinic provider.

Types of covered services provided in clinics include:

Added: and Alternative
Deleted: ~~technology~~

- Diagnosis of medical condition
- Completion of durable medical equipment assessments to include Augmentative and Alternative Communication assessments
- Development of a patient care plan
- Therapy (physical, speech, occupational)
- Patient/parent education
- Audiology services
- Physician services
- Psychological services
- Multidisciplinary evaluations
- Orthotic services
- Prosthetic services
- Optometrical services
- Dental services
- Nutrition services
- Prescriptions for services or medications
- Nursing and social work services
- Case management/Care coordination
- Hearing aid services
- Vision services

For details of dental services covered in children's specialty clinics see Rule No. 560-X-15.06 (3) of the *Alabama Medicaid Administrative Code.*

A patient care plan is required for each child and a service coordinator is responsible for arranging specialty and needed social services for the family.

100.2.2 Reimbursement

Children's Specialty Clinics will be reimbursed by an encounter rate.

Governmental providers of Children's Specialty Clinic Services will be reimbursed by an encounter rate based on reasonable allowable cost, as defined by OMB Circular A-87, established by the Medicaid Agency based on completion of the required cost report documentation. The cost report must be received by Alabama Medicaid Agency on or before February 28.

Non-governmental providers will be paid their usual and customary charge not to exceed the maximum allowable rate established by Medicaid.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2026 American Medical Association and © 2026 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Claims may be submitted for reimbursement for only one clinic visit per date of service per recipient, except in the case of dental visits. A dental encounter may be billed in conjunction with only one other clinic visit for the same date of service for the same recipient.

NOTE:

Procedure code D8080 is limited to once per year with prior authorization.

Procedure code D8680 is limited to once every two years with prior authorization.

Procedure code D9310 is limited to once per recipient per lifetime with prior authorization.

100.2.3 Encounters

Covered encounters are face-to-face clinic contacts during which a health professional team provides medical services to a patient. They are identified based on the data from clinic sign-in sheets and the individual medical records.

The definition of a health professional depends upon the type of clinic.

Clinics must be attended either by a physician or a certified registered nurse practitioner. Some examples include:

- Cerebral palsy
- Cleft palate
- Clubfoot
- Craniofacial
- Cystic fibrosis
- Eye
- Genetics
- Hearing
- Hemophilia
- Limb Deficiency
- Multi-specialty
- Neurology
- Neuromotor
- Neurosurgical
- Orthopedic
- Pediatric Evaluation
- Pediatric surgery
- Scoliosis
- Seizure
- Spina bifida
- Teen Transition
- Urology clinics

To be counted as a non-physician encounter, the health professional(s) must be qualified to perform the service, and although a physician is not present, the service must be provided under the direction of a physician. Examples of non-physician clinics include Augmentative and Alternative Communication, feeding, hearing assessment, hearing aid orientation/maintenance, infant/toddler functional evaluation, speech, and seating, positioning & mobility.

Added: and Alternative

Multiple contacts with the same health professional(s) that take place on the same day at a single location constitute a single encounter. Services incident

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2026 American Medical Association and © 2026 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

to an encounter, or subsequent to the clinic encounter, such as social services, case management, nursing, writing of prescriptions, clerical, therapy, and pre-certification evaluations are inclusive in the encounter and should not be billed separately.

For example, if a client comes to the limb deficiency clinic, the minimum staffing standards must be met in order for the contact to be counted as an encounter. In this case, the orthopedist, physical therapist, and social worker must be present. Their face-to-face contact with the client constitutes an encounter. Subsequent visits for purposes of physical therapy only by the therapist do not constitute an encounter since these costs are included in the encounter rate that is billed only when the minimum staffing standards for a clinic are met.

100.2.4 Maintenance of Records

The provider must make available to the Alabama Medicaid Agency at no charge all information regarding claims for services provided to eligible recipients. The provider will permit access to all records and facilities for the purpose of claims audit, program monitoring, and utilization review by duly authorized representatives of federal and state agencies. The provider maintains complete and accurate fiscal records that fully disclose the extent and cost of services.

The provider maintains documentation of Medicaid clients' signatures. These signatures may be entered on a sign-in log, service receipt, or any other record that can be used to indicate the clients' signatures and dates of service.

The provider maintains all records for a period of at least three years plus the current fiscal year. If audit, litigation, or other legal action by or on behalf of the state or federal government has begun but is not completed at the end of the three-year period, the provider retains the records until the legal action is resolved. The provider must keep records in a format that facilitates the establishment of a complete audit trail in the event the items are audited.

100.3 Prior Authorization and Referral Requirements

In general, clinic procedure codes generally do not require prior authorization; however, an exception to this requirement includes services for orthodontia. Refer to the Dental, Chapter 13 for guidelines.

For services outside of the encounter that require prior authorization, refer to Obtaining Prior Authorization, Chapter 4 for guidelines..

For services provided to recipients enrolled in the Alabama Coordinated Health Network (ACHN) Program, refer to Chapter 40, for guidelines.

100.4 Cost Sharing (Copayment)

Copayment does not apply to services provided by Children's Specialty Clinics.

100.5 Completing the Claim Form

To enhance the effectiveness and efficiency of Medicaid processing, providers should bill Medicaid claims electronically.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2026 American Medical Association and © 2026 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.

Children's specialty clinics that bill Medicaid claims electronically receive the following benefits:

- Quicker claim processing turnaround
- Immediate claim correction
- Online adjustment functions
- Enhanced access to eligibility information

Refer to Appendix B, Electronic Media Claims Guidelines, for more information about electronic filing.

NOTE:

When filing a claim on paper, a CMS-1500 claim form is required. Medicare-related claims must be filed using the Medical Medicaid/Medicare Related Claim Form.

This section describes program-specific claims information. Refer to Chapter 5, Filing Claims, for general claims filing information and instructions.

100.5.1 Time Limit for Filing Claims

Medicaid requires all claims for clinics to be filed within one year from the date of service. Refer to Section 5.1.5, Filing Limits and Approved Exceptions, for more information regarding timely filing limits and exceptions.

100.5.2 Diagnosis Codes

The *International Classification of Diseases - 10th Revision - Clinical Modification* (ICD-10-CM) manual lists required diagnosis codes.

100.5.3 Procedure Codes and Modifiers

Medicaid uses the Healthcare Common Procedure Coding System (HCPCS). HCPCS is composed of the following:

- American Medical Association's Current Procedural Terminology (CPT)
- Nationally assigned codes developed for Medicare
- Locally assigned codes issued by Medicaid. Effective for dates of service on or after 01/01/2004, use national codes.

The CPT manual lists most procedure codes required by Medicaid. The (837) Professional, Institutional and Dental electronic claims and the paper claim have been modified to accept up to four Procedure Code Modifiers.

The following procedure codes have been approved for billing by children's specialty clinics.

The Current Procedural Terminology (CPT) and Current Dental Terminology (CDT) codes descriptors, and other data are copyright © 2026 American Medical Association and © 2026 American Dental Association (or such other date publication of CPT and CDT). All rights reserved. Applicable FARS/DFARS apply.
