30 Preventive Health Education

Preventive Health Education Services are services provided by a physician or other licensed practitioner of the healing arts (within the scope of practice), or by other qualified providers, designed to prevent disease, disability, or other health conditions or their progression; to prolong life; and to promote physical and mental health and efficiency.

The purpose of these services is to reduce unintended adolescent pregnancies; decrease the rate of infant mortality; and decrease the incidence of maternal complications, low birth weight babies, and deaths among infants and small children.

The policy provisions for preventive health education services can be found in the *Alabama Medicaid Agency Administrative Code,* Chapter 50.
